CASE STUDY

SECUREPASS · DEFENCE · CENTRAL ASIA

A Central Asian defence ministry deploys SecurePass to control access for defence users

SecurePass identity and access management, delivered with implementation, integration and training.

SECTOR	REGION	SOLUTION	
Defence ministry	Central Asia	SecurePass	LIVE

IMPACT AT A GLANCE

1 identity
for every defence user

PKI + FIDO2
phishing-resistant sign-in options

Need-to-know
access enforced by role

Sovereign
on infrastructure the ministry controls

THE CUSTOMER

The customer is the defence ministry of a Central Asian country. Its users work with highly sensitive systems, and access must be strictly controlled, monitored and auditable. The ministry selected SecurePass to manage identity and access for its defence users.

THE CHALLENGE

Defence systems are a prime target, and a single compromised account can expose sensitive operations.

1

High-value targets

Defence users are targeted by phishing and credential theft, so passwords alone are not enough.

2

Strict hosting

Identity systems must run on infrastructure the ministry controls, often in isolated networks.

3

Need-to-know access

Users must reach only the systems their role allows, with every access recorded.

THE GOAL One governed identity and strong authentication for every defence user, on infrastructure the ministry controls.

THE SOLUTION

eMudhra deployed SecurePass for the ministry, with implementation, integration and training.

Central identity
One authoritative identity for every defence user.

Strong authentication
MFA options including PKI and FIDO2, suited to high-assurance environments.

Role-based access
Access follows role and clearance, with reviews and audit logs.

Sovereign deployment
SecurePass runs on-premises and supports air-gapped environments.

WHAT THE CUSTOMER NEEDED	HOW EMUDHRA DELIVERED
Stop credential attacks	Strong, phishing-resistant MFA
Enforce need-to-know	Role-based access with reviews
Keep control of infrastructure	On-premises, air-gap capable deployment
Full accountability	Audit logs for every access
Self-sufficient teams	Implementation, integration and training

RESULTS

What changed for the customer

- Defence users have one governed identity across systems.
- Access is protected by strong authentication.
- Rights follow role and clearance, with full audit trails.
- The ministry's teams are trained to operate the platform.

WHY EMUDHRA

Trusted in defence
SecurePass protects privileged access for defence organisations.

Sovereign by design
On-premises and air-gapped deployment.

High-assurance MFA
PKI-based and FIDO2 authentication.

About eMudhra. eMudhra is a globally trusted provider of digital trust services, offering eSignatures, PKI, Certificate Lifecycle Management, Multi-Factor Authentication and Identity & Access Management solutions. Licensed by the Controller of Certifying Authorities (CCA), India, eMudhra serves 1,000+ enterprises across 40+ countries, helping organisations build secure, compliant and paperless digital ecosystems.
