eMudhra: Leading the
Digital Security Revolution

As a pioneer in digital security and trust services, eMudhra has been at the forefront of providing innovative solutions that safeguard digital interactions. Our commitment to excellence, backed by extensive experience and industry-leading infrastructure, positions us as the largest Certifying Authority in India. With a robust portfolio of certifications, accreditations, and active participation in global consortia, we continuously drive thought leadership in the digital security landscape. Discover how eMudhra's unparalleled expertise and infrastructure can empower your digital transformation journey.

Experience and Infrastructure

Largest Certifying Authority in India

Largest Certifying Authority in India As the largest Certifying Authority (CA) in India, eMudhra has set the benchmark in digital security and trust services. Our extensive experience and robust infrastructure ensure the highest level of trust and reliability for our clients.

Runs its Own Cloud Data Center

For the past 10 years, eMudhra has been operating its own cloud data center, providing secure, scalable, and resilient infrastructure to support our services. Our state-of-the-art data center ensures optimal performance and security for all our digital solutions.

Security Operations Center (SOC)

eMudhra operates its own Security Operations Center (SOC), a dedicated facility equipped with the latest technology and staffed by skilled professionals. Our SOC monitors and manages security threats in real-time, ensuring continuous protection for our clients' digital assets.

Certifications and Accreditations

WebTrust Accreditation

eMudhra is accredited by WebTrust, affirming our adherence to the highest standards of trust and security. Our solutions meet the stringent criteria required for this prestigious accreditation, providing assurance of our commitment to excellence.

Adobe Approved Trust List (AATL)

Our solutions are part of the Adobe Approved Trust List (AATL), ensuring compatibility and trust with Adobe's extensive suite of products. This inclusion underscores our dedication to providing trusted digital security solutions.

EAL4+ Certification

eMudhra's products meet the Evaluation Assurance Level 4+ (EAL4+) standards, reflecting our commitment to rigorous security and quality benchmarks. This certification ensures that our solutions provide reliable and robust security features.

Global Trust Service Provider with Own Root

As a global Trust Service Provider (TSP) with our own root, eMudhra offers comprehensive trust services through our global root emSign. We issue all types of certificates, including SSL, code signing, SMIME, and document signer certificates, and offer managed PKI services. Our solutions are recognized and trusted worldwide, designed to meet the needs of a global clientele, ensuring seamless and secure digital interactions.

Thought Leadership and Industry Participation

Chair of Asia PKI Consortium

Our leadership in the digital security domain is exemplified by our role in the Asia PKI Consortium. This position underscores our commitment to driving the future of Public Key Infrastructure (PKI) and setting industry standards.

Member of Cloud Signature Consortium

eMudhra is an active member of the Cloud Signature Consortium, collaborating with industry leaders to advance digital signature technologies and standards. Our participation ensures that we stay at the forefront of innovation and best practices.

Member of the Interoperable Global Trust Federation (IGTF)

We are members of the Interoperable Global Trust Federation (IGTF), contributing to the development and adoption of trusted digital identity and trust services. Our involvement reflects our dedication to pioneering secure and trusted digital ecosystems.

Driving Thought Leadership

At eMudhra, we are not just participants in the digital security landscape; we are leaders and innovators. Our thought leadership is driven by our extensive experience, industry certifications, and active participation in global consortia. We are committed to advancing the field of digital security and trust, ensuring that our clients are always at the cutting edge of technological advancements.
